*** Notes of Significance ***

Fires highlighted in yellow have submitted a final ICS-209

Date: 9/15/17

[illegible]

Evening Brief

Date: Friday September 15, 2017

Weather Summary

A drying trend is expected this weekend, with temperatures warming, although they will still remain just below normal for the time of year. Winds will also decrease Saturday, but start to increase somewhat by Sunday.

Another strong and even colder storm is expected Monday through next week, dropping temperatures to nearly 15-20 degrees below normal and bringing additional wetting rains, high elevation snowfall and gusty winds to the northern half of the Great Basin.

Preparedness Levels

Great Basin	3
National	5

Great Basin Fire Activity (from Irwin): Light Activity

New Fires and Acres: 7 fires for 406.4 acres; 0 acres large fire growth; 1 new large fire

Resources:

- Crews: 4 T1 IHCs in GB: 2 Committed, 1, Available and 1 R&R.
 - GBCC has committed an estimated 36+ Type 3, 4, 6 engines.
 - 2-T1 and 4-T2 helicopters are available in GACC.
-

Great Basin Fire Potential Summary

Moisture with thunderstorms and prolonged higher humidity over the past week has significantly moderated fuel conditions across the region. Fire danger indices continue to drop across the Great Basin. However, fine fuels will still dry over a period of 1-2 days and will be receptive to fire starts and spread after dry periods and during windy conditions.

Portions of far western/central NV and western Idaho will see a drying trend and may continue to have the potential for new fire starts over the weekend. There is no long term drying trend in the forecast for the next 7-10 days. A brief drying this weekend will be replaced by an even stronger and colder storm system early next week.
